DETAILED ACTION

Allowable Subject Matter

Claims 3-18(Renumbered 1-16) are allowable.

The following is an examiner's statement of reasons for allowance: In response to remarks and claim amendments made in Applicants' Amendment submitted 05/06/2008, as well as, a Petition to Withdraw Holding of Abandonment submitted 06/12/2008, and, upon conclusion of a comprehensive search of the pertinent prior art, the Office indicates that the claims, as amended, are allowable.

Regarding independent claim 3, patentability exists, at least in part, with the claimed features of wherein the actuation device includes: a first rotating component coupled to the plug-in module by a first pin, wherein the first rotating component is pivotable about the first pin; and a second pin positioned on the first rotating component a first distance from the first pin so that, as the first rotating component rotates about the first pin, the second pin moves in an arcuate manner that includes a first motion component that is substantially parallel to the first axis; and wherein the first arm includes a first orifice capable of receiving the second pin so that, as the first rotating component is rotated in a first direction, the second pin forces the first arm inward toward the plug-in module.

Regarding independent claim 11, patentability exists, at least in part, with the claimed features of wherein the actuation device includes a second arm coupled to the plug-in module by a first pin, wherein the second arm is pivotable about the first pin, wherein the second arm extends a majority of a first distance from the first edge of the

plug-in module to the second edge of the plug-in module; wherein the actuation device further includes a second pin positioned a second distance from the first pin, wherein the second pin is mechanically coupled to the second arm so that, as the second arm rotates about the first pin, the second pin moves in an arcuate manner that includes a first motion component that is substantially parallel to the first axis; and wherein the first arm includes a first orifice capable of receiving the second pin, so that the first arm rotates about the second pin as the second arm is rotated. Heitkamp US Patent 6406312 and Nolan et al US Patent 6252514 are cited as the closest pertinent prior art teaching, in combination, some elements of the claimed invention, but cannot be modified to teach or disclose all of the elements of the claimed invention as arranged and disposed in the manner as claimed by the Applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAMEON E. LEVI whose telephone number is (571)272-2105. The examiner can normally be reached on Mon.-Thurs. (9:00 - 5:00) IFP, Fridays Telework.
